

## Summer Math

As the school year winds down, we all look forward to summer fun, relaxation, and vacations. Summer is a great time to take a break from the work and structure of school; however, research has shown that students can lose as much as a couple of months' worth of learning in the summer, especially in math. The children have worked hard this year to practice and master math skills, and we want to enhance the retention of these skills through the summer and into next year through a summer math program

We strongly encourage students to reinforce math concepts during the summer. There are several ways this can be done. Parents can order the Summer Solutions Common Core Mathematics books (see below) for students to practice math skills. Students can also work with their current online math program. Students have access to their **Mathletics** (Grades 1-5) and **Math IXL** (Grades 6 and 7) accounts which can be used throughout the summer. If your child is struggling in math, Mathnasium offers a summer math program tailor-made to your child's needs.

By spending just minutes a day, students get the practice they need to be confident with the skills they learned this year and be ready to master new skills next year.

To order summer math workbooks:

The website to order is [www.summersolutions.net](http://www.summersolutions.net)

**The school code is H70808ALO**

The books will be mailed to your home.

Students should choose the workbook indicated in the chart

**\*English workbooks are also available if you are interested in purchasing those as well.\***

Current Grade Level	Book to Order
Kindergarten	Common Core Mathematics K
1st Grade	Common Core Mathematics 1
2nd Grade	Common Core Mathematics 2
3rd Grade	Common Core Mathematics 3
4th Grade	Common Core Mathematics 4
5th Grade	Common Core Mathematics 5
***6th Grade See Below	Common Core Mathematics 7 *Struggling students can use the level 6*
***7th Grade See Below	Common Core Mathematics 8

**\*\*\* For 6th and 7th grade, you need to choose NEXT YEAR'S GRADE in order to have the option to purchase the book that is a year ahead of current grade level.\*\*\***
